EUR-CL (EPC): A46B007/04

ABSTRACT:

CHG DATE=20010202 STATUS=O>The cleaning device (16) comes in a shape similar to a dish washing brush. Its cleaning head (1) is covered by an inner and outer layer (2b,4) of micro fibre (2) with a foam rubber layer (3) between them. The bar-shaped handle (7) can be rotated around a bolt (10), which serves as a horizontal axle and is joined to a second bolt, which penetrates a disc (12) and a plug element, consisting of two soft rings (14,15) with a

narrower rigid area (13) between them. When the plug is inserted into the space (2b) in the centre of the cleaning head (1) it is kept in place by the soft rings (14,15) which also act as seals. All materials are dishwasher proof.
